Additional things to consider when booking per person:

1. We use a counter to tally number of people served, but you can also use tickets/badges of some type (we can also provide). This is especially useful at public parks because it can be hard to distinguish who is who, and it's easy to accidentally serve non-party attendees!
2. We can not guarantee a significant amount of non-serving time at your event. If you would like us there for a specific number of hours, additional charges may apply. Per hour rates also available.
